

Blak-JAK® Torque Pro™

HAMMERLESS, QUICK-CHANGE VALVE COVER RETENTION SYSTEM

The Blak-JAK Torque Pro Valve Cover Retention System utilizes a hydraulic wrench to tighten and loosen the valve cap retainer and then requires only a quarter turn to remove the retainer. This quick and easy valve access allows for faster change-outs and improved safety by eliminating the need for hammers.

This system works with OEM valve covers as well as Mission® "L" style plugs. No modification to the fluid end is required.

Features and Benefits

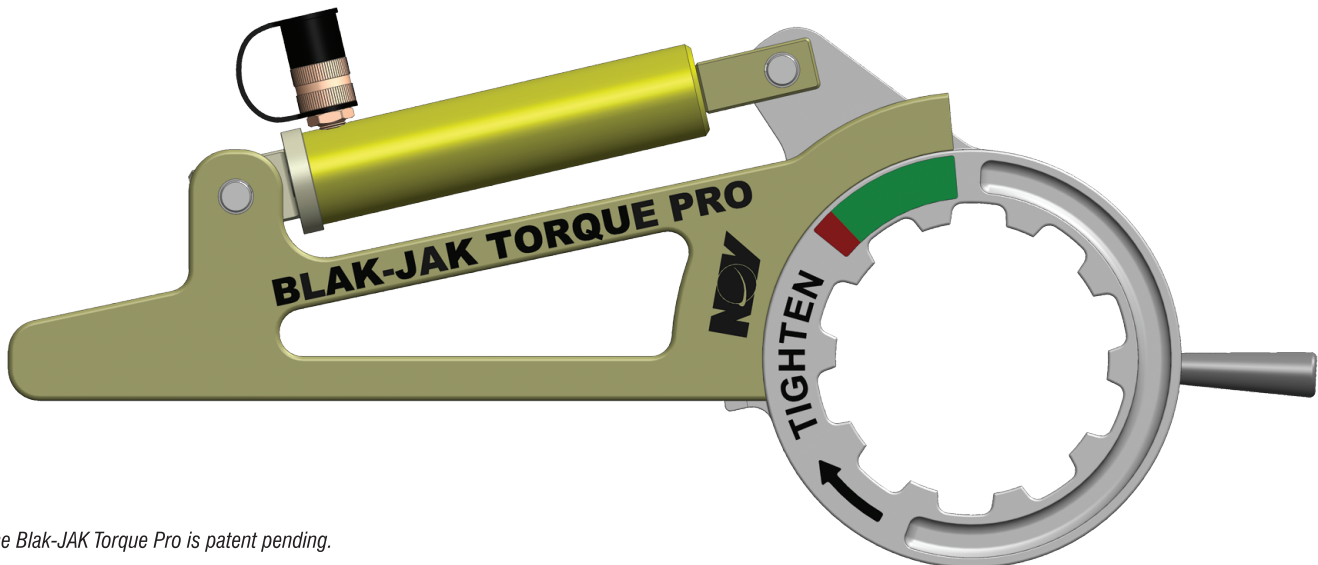

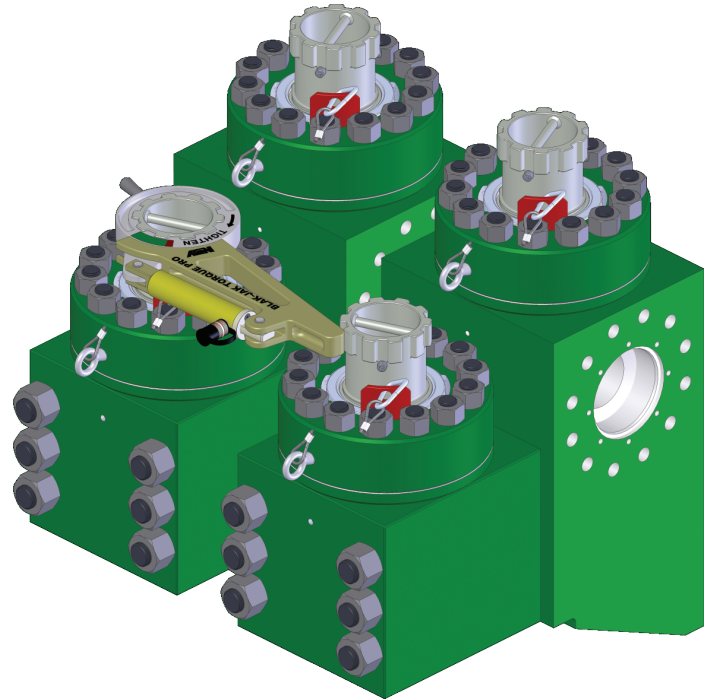

- Eliminates need for hammers
- Reduces time required for change-outs
- Quick and easy valve access
- Requires only a quarter turn to remove retainer
- Hydraulic wrench to tighten and loosen
- Ensures a constant retainer thread torque for longer valve cover and gasket life

System Components

- Valve cap lug adapter assembly
- Lug ring assembly
- Torque Pro wrench
- Stop locator

Models Available

- National 12-P-160 and 14-P-220
- Oilwell A1700-PT "L" (5000 psi)
- Continental Emsco FC-1600, FB-1600 "L", and FC-2200

The Blak-JAK Torque Pro is patent pending.
