

TK™ -Ring II — Accessory Interface

New Technology

TK-Ring II for un-modified Premium Connection services on Oil Production, Water-Injection and Gas Service applications

Features

- TK-Ring II insert allows for interface with “standard tolerance” Premium Connections
- Same TK-Ring for TK-Lined full-length joints, pups and/or CRA accessories
- No change in torque-values or doping procedures
- No reduction in TK-Lined diameter at the accessory interface

Benefits

- Same TK-Rings used for the entire string, top to bottom
- Correctly interfaced CRA accessories to TK-Lined carbon-steel pipe, no GALVANIC corrosion
- Ease of assembly of completion equipment and interface to TK-Lined Premium Connection carbon-steel joints
- Any damaged pups or couplings can be simply changed-out “on location”, no need to return onshore for repair

*Patent Pending
