

Tanks

Fiberglass Storage Tanks

Keep it contained.

Ideal for holding fresh or salt water, our fiberglass tanks are built to last. We proudly manufacture in San Angelo, Texas, driven by our team of trusted, experienced engineers and technicians. With customizable options like isophalic and vinyl resins, skid-mounted packages, and more, we are able to meet the needs for your specific site.

Field-proven and trusted in the industry, our fiberglass tank is a reliable storage solution for applications from Production sites to Saltwater Disposal sites.

Features

- Isophalic and vinyl ester resins available, either as liner for a normal fiberglass tank or with the tank built 100% of specialized resins
- Meets all standards set forth in ASTM 3299, ASTM 4097, ASME RTP1, and API 12P
- Available with any combination of victaulic, flanged, or threaded connections
- Additional customization available upon request

Specifications

- Tanks can be built to the following sizes:
 - 400 bbl
 - 500 bbl
 - 750 bbl
 - 1000 bbl

Tank Pedestals

- Built to accommodate both 12' and 15' 6" diameter tanks, our re-usable pedestals make moving and installing tanks much more convenient
- 12' supports over 266,000lbs
 - 15'6" supports up to 492,000lbs
 - Quick and easy installation
 - Easily cleaned and easily re-used
 - Insulating, non-conductive and rot and mold resistant
