OrionNET™ v3.0 Release

Subject: **New Features and Enhancements** Highlights for the Release of **OrionNET v3.0**

CTES is pleased to announce the release of **OrionNET v3.0** software!

Following are **just a few** of the enhancements included in the new **OrionNET v3.0**

- New options added to OrionNET reports Cerberus 3D well diagram
 - Cerberus 2D well diagram
 - Cerberus CT string diagram
 - Cerberus Reeltrak CT fatigue status chart
 - Cerberus Orpheus surface weight chart with overlaying OrionNET data
 - Plug summary report
 - Summary of time on location
- Optional job-based recording helps ensure entire job is recorded to a single OrionNET database
- New categories for comments to help identify and summarize job tasks
- Improved integration with Cerberus real-time fatigue and forces monitors
- Read text data from 3rd party ASCII data sources
- Coming Soon! Share data online with OrionNET LDT and view real-time data from anywhere in a browser based viewer.

Contact the **CTES Business Development team** today for further information or a price quote at ctessales@nov.com or visit nov.com/ctes.
