

Introducing the best performing and longest lasting valve in hydraulic fracturing

Our innovative line of well service valves employ a **proprietary urethane insert** with unprecedented wear characteristics. Available fully-bonded or with snap-on insert, these valves are able to operate in the toughest shale plays in the world. Numerous field tests have shown that these valves provide their users with up to **three times the lifespan** of competitors' offerings.

Application

- Hydraulic fracturing

Features

- Standard bonded or optional snap-on polyurethane insert
- Proprietary Long-Life urethane insert
- Designed to handle even the highest amount of solid contents
- Forged high strength steel unibody construction allowing greater flow area
- Reduces abrasion, resulting in fewer replacements, longer run times, and reduced cost per pumping hour
- Maximum temperature rating of 180°F (82°C)
- Maximum pressure rating of 20,000 psi
- Compatible with most frac pump fluid ends
