

We, The Doers
Quality you can rely on
Service you can trust

Fiberglass field service

At Fiber Glass Systems (FGS), we stand by the quality of our fiberglass petroleum tank and pipe products and the expertise of our team members.

As a customer, you know you're in good hands with FGS, and our field service teams are strategically placed across North America to make sure your project is a success.

As the only fiberglass underground solutions provider that offers an entire division devoted to field service, our full-time staff is always there when you need assistance with repairs, modifications, inspections, retrofits, upgrades, and certifications.

Our staff is proud to deliver the high level of service and professionalism you expect from the FGS team.

Our technicians are trained and certified in the following areas:

- FRP fabrication and manufacturing techniques
- Confined-space entry
- Scaffolding and fall protection
- Hazmat/DOT general awareness
- OSHA construction and general industry standards
- Hazardous waste operations/emergency response
- Hazardous communication safety
- Excavation safety
- API WorkSafe™
- AED/CPR and First Aid certified
- All modifications and upgrades
- Respirator training, fit, and testing
- Electrical hazard awareness
- Bloodborne pathogen training
