

Service Center Network

North America

We are **more than just a manufacturer** of coiled tubing.
We are your **partner** through your entire operation.

We service the industry with our growing network of service centers, supporting your global needs. Strategically placed, our regional locations can deliver the products and services you need, when and where you need them.

Our service centers, located in Texas and Canada, offer a closer location to your North American operations to meet your demands and reduce your downtime.

Our services

- Finished goods inventory, storage and spooling
- Maintenance programs and preventative measures
- String repair and welding
- Testing and inspections
- Special projects
- Coiled tubing equipment, nitrogen equipment and iron services
