

NLP Setting Adapter

The NLP Setting Adapter is designed to run and set the NLP Permanent Production Packer. The NLP Setting Adapter may be used on E-line or a hydraulic setting tool. The setting adapter is designed to run on industry standard E-4 setting tool or equivalent. Available in E-4 #10 and E-4 #20 configurations. E-4, #20 shown.

Features and Benefits

- Run on industry setting tools
- May be used on hydraulic or E-line setting tool
- Short length ideal for deviated or horizontal wellbores
- Used in multiple weight ranges

Applications

- Used to run and set NLP Permanent Packer

Technical data

Seal bore in.(mm)	Maximum OD in. (mm)	Setting sleeve length in. (mm)	Setting Adapter length in. (mm)	Assembly number
2.390 (60,71)	3.720 (94,49)	27.230 (691,64)	16.880 (428,75)	073-0239
3.000 (76,20)	4.437 (112,70)	30.000 (762,00)	21.000 (533,40)	073-0300
4.000 (101,60)	5.690 (144,53)	28.300 (718,82)	19.750 (501,65)	073-0400
6.000 (152,40)	8.190 (208,03)	27.000 (685,80)	19.890 (505,21)	073-0600
