

Municipal WWT

Application: Wastewater treatment

Product: 36" and 48" F-Chem pipe

Features & Benefits: F-Chem pipe was installed in an activated sludge line in Dallas, Texas replacing ductile iron. This installation consisted of nine basins.

Fiberglass piping is a cost effective alternative to carbon steel and ductile iron. Corrosion resistance across the pipe wall provides protection from both internal fluids and external conditions. NOV Fiber Glass Systems can provide technical support to convert steel designs to fiberglass designs.
