

Muncher Series

SB Muncher

Series A Muncher

EZstrip™ TR Muncher

Our muncher are the perfect solutions for downstream equipment protection. The muncher product family is a range of twin shaft, slow speed, high torque grinders that prevent equipment from blockage problems by crushing, cropping, and shearing the solid in liquid. The self-cleaning Mono munchers are ideal for heavy duty screening, and, by combining a discreen with a muncher, you have the option of keeping all macerated and screened residue in the main flow, eliminating removal costs.

QR Code

SB Muncher

Capacities up to 60 m³/h

Experience energy savings with our compact unit that replaces high-speed, high-power centrifugal macerators

Series A Muncher

Capacities up to 1400 m³/h

The latest generation twin shaft channel grinder for downstream equipment protection.

EZstrip™ TR Muncher

Capacities up to 500 m³/h

A competitive solution for solids grinding and sludge conditioning with maintain-in-place capabilities.
