

## Simplifying. Understanding. Caring.

At NOV, we understand your customers are looking for only the best, most reliable equipment in the market. Let us help you be the one they choose. We designed your equipment. We engineered and built it. We installed it and tested it. And we are here to help care for it.

Together, we can help make your fleet as attractive as it possibly can be.

# Marine and Construction Fleet Care

**NOV Rig Technologies**

## An integrated suite of services

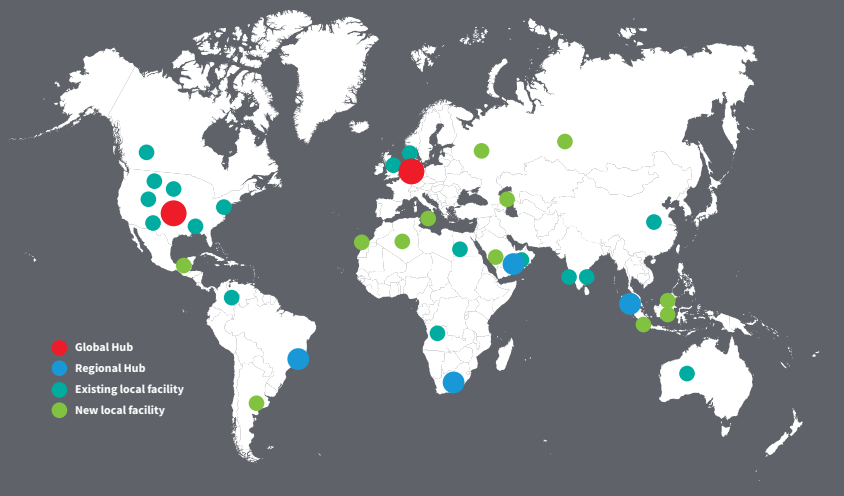

Fleet Care offers the broadest range of support products, services, and integrated solutions in the energy industry that help drilling contractors and operators keep their fleets running safely and efficiently.

Our integrated suite of services includes parts, training, field engineering, maintenance, and remote monitoring capabilities that increase efficiency and profitability, while ensuring uptime and reliability. Efficiently.

## How can we help you?

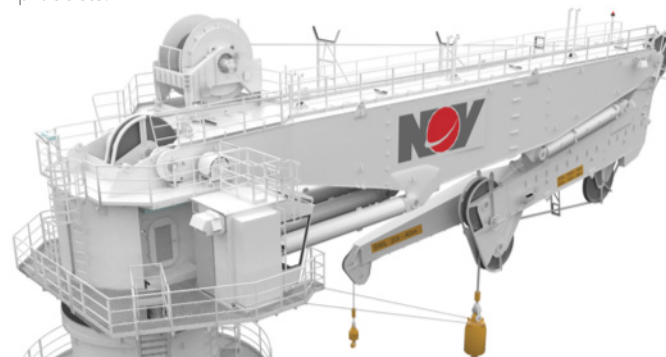

### Global support

With 24/7 technical support around the world, our network of highly trained OEM experts offers recertification and upgrade services, helping ensure optimal operation of your rigs and equipment. Our Fleet Care team reviews your fleet status and explains our available offerings, helping you develop a plan to meet your needs. With reactivation assistance, we help you seamlessly get back to work.

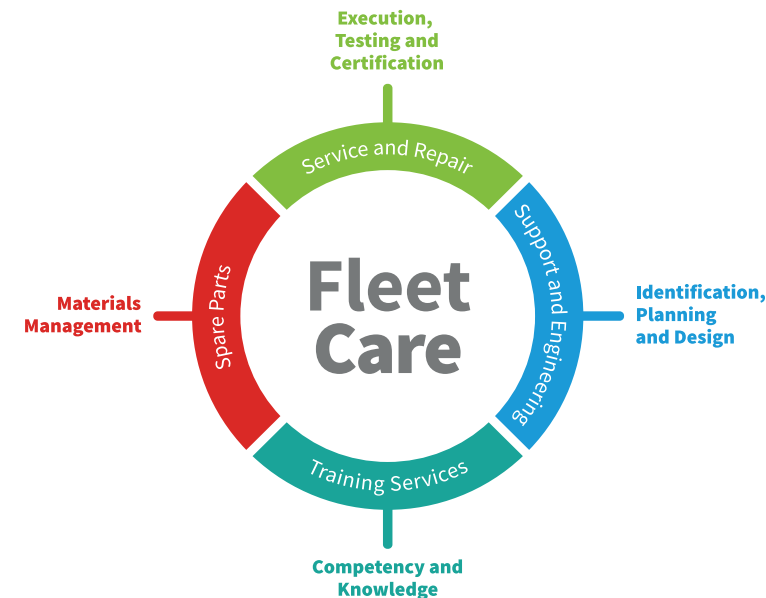

### Maintenance

We can help you with repairs, refurbishments, and exchanges. With a wide variety of spare parts available in our global warehouses, we supply the lifting and handling solutions you need for a successful operation. By performing annual surveys with additional performance checks, we help you maximize the use of your products.

### Training

We provide portable, state-of-the-art simulation training for all scenarios. Our crane operator training helps your operators perform at their best and our assessment courses help you optimize the performance of your NOV equipment.

### Optimization and innovation

eHawk™ enables remote monitoring of the health of your crane. Through our Rigsentry™ condition monitoring, you can gain insight into the health of your equipment. Our continuous investment in R&D enables improvement and upgrade of your products.
