

# IWCF Drilling Well Control

## Course Description:

This course is designed for drilling crew (drillers and assistant drillers) and others with a requirement to hold an IWCF Well Control certificate. The course consists of classroom training, subsea drilling simulator training, and final exams.

## At the conclusion of this course, the participants will be able to:

- Explain the principles and procedures used in well control operations with subsea BOP stack.
- Use the equipment for well control operations with subsea BOP stack.
- Demonstrate mastering of subsea well control situations by use of subsea drilling simulator.

In an effort to increase safety in the Oil & Gas Industry and help customers utilize NOV equipment in critical drilling operations, Education Services now offers full certification courses in Well Control according to IWCF specifications for Level 3 and 4.

IWCF certified Well Control courses are paired with OEM equipment and advanced downhole simulation technology. This is a unique environment allowing drill crews to train in their specific surroundings, incorporating all components of the drilling process.

## Information

### Target Participants:

This course has been designed for drilling crew members as Drillers and Driller Assistants, as well as for Drilling Supervisors, Well Engineers, OIM's and others with a requirement to hold an IWCF Well Control certificate Level 3 or Level 4.

### Prerequisites:

Good overall understanding of well-control issues and related topics is advised.

### Number of Participants:

10

### Duration:

2 days
