

# 36-in. Safety Pipe Wrench

Our 36-in. Safety Pipe Wrench provides the safest, most effective means for you to manually make and break threaded connections either using two in tandem with a come-along or one wrench using a crane and a vise.

Constructed with lightweight ductile materials, the design eliminates the risk of unexpected failures and is specifically designed to be more than just a hand tool. The ergonomically designed aluminium handle features two gripping locations for easy handling, and a tang and shackle for securing a crane or come-along.

Sold as a single wrench or as part of a kit, the 36-in. Safety Pipe Wrench, is an essential tool for getting the job done safely and correctly the first time.

## Features and Benefits

- **Lightweight aluminium alloy handle** – features two gripping locations for easy handling
- **Up to 4 in. outside diameter (OD) capacity** – completely replaces the need for standard wrenches
- **Ductile alloy materials used** – brittle failures are not a concern
- **Industry-leading load rating** – Up to 4,000 ft-lb torque capacity
- **Balanced carry handle** – oriented for use with load scale and crane
- **Service hand kit** - comes complete with everything necessary to start work right away

## Torque Capacity

<b>1<sup>1</sup>/<sub>16</sub> in.</b>	1,300 ft-lb
<b>2<sup>1</sup>/<sub>8</sub> in.</b>	1,700 ft-lb
<b>2<sup>1</sup>/<sub>4</sub> in.</b>	2,700 ft-lb
<b>2<sup>7</sup>/<sub>8</sub> in.</b>	3,900 ft-lb
<b>3<sup>1</sup>/<sub>8</sub> in.</b>	4,000 ft-lb
<b>4 in.</b>	4,000 ft-lb
