

TK™ -Ring II — Coupled

New Technology

TK-Ring II for un-modified Premium Connection services on Oil Production, Water-Injection and Gas Service applications

Features

- Completely un-modified Premium Connections
- Connections and couplings completely inter-changeable
- Accommodates original thread dimensions, FULL tolerance-range
- Parallel bore, reduced turbulence, better flow, no risk of running-tool hang-up
- Design geometry allows for GAS and FLUID applications on injection or production wells

Benefits

- Stock pipe can be lined
- Can be supplied “ready to run”, TK-Rings pre-installed
- Used pipe can be lined, if connections are acceptable
- No time lost during running as no drifting required
- SAFETY benefit as no personnel in danger-zone during running operations

*Patent Pending
