

**Highest capacity**  
single deck shaker  
on the market

# Alpha Shaker

Everyone thinks they're the top dog until they meet the **Alpha**.

## Brandt's Alpha Shaker maximizes capacity while reducing waste haul off.

This easy-to-use, responsive shaker features a robust, yet simple screen clamping system, enhanced linear motion, with significantly higher handling capacities. More non-blanked open area (NBOA) and produces considerably drier cuttings – all designed to lower your operation's carbon footprint without compromising performance.

### Performance Metrics:

#### Drier Cuttings

Retain more drilling fluid, reducing dilution costs and disposal trips.

#### Higher Capacity, Lower Carbon Footprint

Lower your operation's ESG profile by doing more with less.

#### HSE-Friendly

No more bending, climbing, or reaching – allowing equipment operators to safely stay in one position while getting the job done.

The Brandt™ Alpha™ delivers top performance with the lowest noise level, protecting the operator and maintaining a quiet environment for the surrounding community.

#### Remote Monitoring Ready

Plug and play connectivity with the Shaker Hawk™ remote monitoring and automation platform allowing rig personnel to focus on other tasks.

#### Longer-Life Wearables

Simple maintenance and fewer parts in inventory for an overall lower cost of ownership and operation.

#### Retrofittable

Avoid comprehensive hot work - the unit can retrofit into most Brandt skids in the same day.
