

Mega

Helping you deliver protected pipe. All day, every day.

When extreme and robust thread protection is required, MSI Pipe Protection Technologies' Mega™ composite thread protectors are ideal for the job. Since 1995, Mega continues to be the most requested thread protector offshore for large OD applications due to its performance history and resilient strength.

As fully plastic thread protectors continue to be in high-demand, Mega boasts a unique advantage over traditional plastic; a proprietary blend of resin offering superior corrosion resistance for threaded areas and a steel outer shell for extreme impact resistance. Meeting all current standards for API 5CT, Mega ensures your thread protection is both extreme and industry compliant.

MSI continues to offer the most extensive selection of thread protectors used in the industry, both onshore and offshore, and is equipped to provide the right level of protection in any situation.

ISO 9001: 2015 | ISO 14001: 2015 | OHSAS 18001: 2007

Features and benefits

- API 5CT, Annex-I, 10th edition compliant
- Available in liftable and non-liftable designs
- Available in both API and premium thread connections
- Heavy-duty plastic threads for maximum corrosion protection
- Steel shell to ensure complete impact protection
- Recommended for long-term storage and extreme handling and transportation, particularly offshore
- Designed for extreme weather conditions; tested from -50°F to 150°F
- CNC cut for a precision fit
- Sizes range from 7 in. – 20 in.
